Adrian Rhomel Bandong

Civil Engineer

Driven Civil Engineer with hands-on experience in project management, maintenance, and construction within the hospitality industry. I bring a strong passion for problem-solving, a collaborative approach, and a growing skill set in both traditional civil engineering and innovative BIM modeling. Dedicated to delivering high-quality results, I am always eager to expand my knowledge and contribute meaningfully to every project I undertake. Focused on continuous improvement, I aim to deepen my expertise while driving impactful, efficient outcomes in the engineering field.

Education

2014 - 2020
Bachelor of Science in Civil Engineering

Saint Louis University

Expertise

- Revit
- Sketchup
- Project Management
- Cost Estimation
- Engineering Documentation
- Effective Communication

Language

English

Filipino

Experience

February 2023 -
Baguio Country Club
Maintenance Engineer / Civil Engineer

- As a Civil Engineer / Maintenance Engineer at Baguio Country Club, I am responsible for overseeing a diverse portfolio of ongoing projects at a prestigious hotel and mountain resort. These projects encompass a wide range of activities, including the renovation of existing structures and rooms, as well as the construction of new facilities within the resort.
- I collaborate closely with cross-functional teams to ensure the successful execution of each project. This includes coordinating with architects, contractors, and subcontractors to ensure that projects adhere to design specifications and timelines.

2025 -
Baguio Country Club
Pollution Control Officer

- Led the comprehensive environmental compliance framework by serving as the primary liaison with regulatory authorities and overseeing all pollution monitoring, reporting, and control protocols. This involved orchestrating waste analysis and characterization studies (WACS), managing wastewater and air quality standards, and coordinating with specialized contractors for hazardous waste disposal and desludging. By bridging technical engineering expertise with regulatory diplomacy, the role ensured that all facility operations adhered to stringent environmental mandates while upholding the high operational standards of a premier hospitality destination.

2017 - 2018
JMZ Engineering and Construction / Baguio City, Benguet
Intern

As an intern at JMZ Engineering and Construction, I played a pivotal role in overseeing multiple construction projects. I managed the processing of essential engineering documents, conducted cost estimates for project phases, and collaborated with laborers. This hands-on experience enhanced my understanding of construction project management and engineering documentation.
